

6. A wireless terminal comprising:
an antenna;
a first visual indicator that indicates to a user of said wireless terminal when a radio is receiving;
and
a signal lead for carrying an RF signal from said radio to said antenna and from said antenna to said radio and for carrying a first baseband signal from said radio to said first visual indicator for activating said first visual indicator.

7. The wireless terminal of claim 6 further comprising said radio.

8. The wireless terminal of claim 7 wherein said radio is integral to a PC radio card.

9. The wireless terminal of claim 6 wherein said signal lead is connected to said radio by a detachable connector.

10. The wireless terminal of claim 6 further comprising a second visual indicator that indicates when said radio is transmitting and wherein said signal lead also carries a second baseband signal from said radio to said second visual indicator.

11. A wireless terminal comprising:
a radio;
an antenna;
a first visual indicator that indicates to a user of said wireless terminal when said radio is operating; and
a cable that is detachably connected to said radio and that is also connected to said antenna for carrying an RF signal and for carrying a baseband signal from said radio to said first visual indicator;
wherein said first visual indicator indicates when said radio is receiving and further comprising a second visual indicator that indicates when said radio is transmitting and wherein said cable also carries a second baseband signal from said radio to said second visual indicator.

REMARKS

Claims 1-11 were present for examination and were rejected. Claims 1-11 remain pending and are not amended herein. For the reasons set forth in detail below, the rejection of claims 1-10 is respectfully traversed.

Before addressing the various bases of rejection on the merits, the Applicant is compelled to remind the Examiner that at this point in the prosecution of the above-captioned patent application, the
